Course Content
- Understanding the TCP/IP Protocol Suite
- Understanding the Network Infrastructure
- Understanding the Network Infrastructure
- Understanding the Network Infrastructure
- Understanding Basic Cryptography Concepts
- Describing Information Security Concepts
- Understanding Network Applications
- Understanding Common Network Application Attacks
- Understanding Windows Operating System Basics
- Understanding Linux Operating System Basics
- Understanding Common Endpoint Attacks
- Understanding Network Security Technologies
- Understanding Endpoint Security Technologies
- Describing Security Data Collection
- Describing Security Event Analysis
